

Un-stroll

City tour and Zvieri in Geneva at night
7 November 2014 03:00 - 05:00

Daniel Brefin and Simon Etter, 2014

«Un-stroll» is a guided tour/performance through Geneva followed by a «Zvieri» (4 o'clock snack) in the middle of the night. The darkness swallows the view, urban everyday noises make room for less obvious sounds, most people have disappeared from the public space. «Sightseeing» becomes «sightlistening» and «mindseeing». How does our perception of space and the meaning of the urban change? How does the attention move if expectations of place, time and significance are not fulfilled?

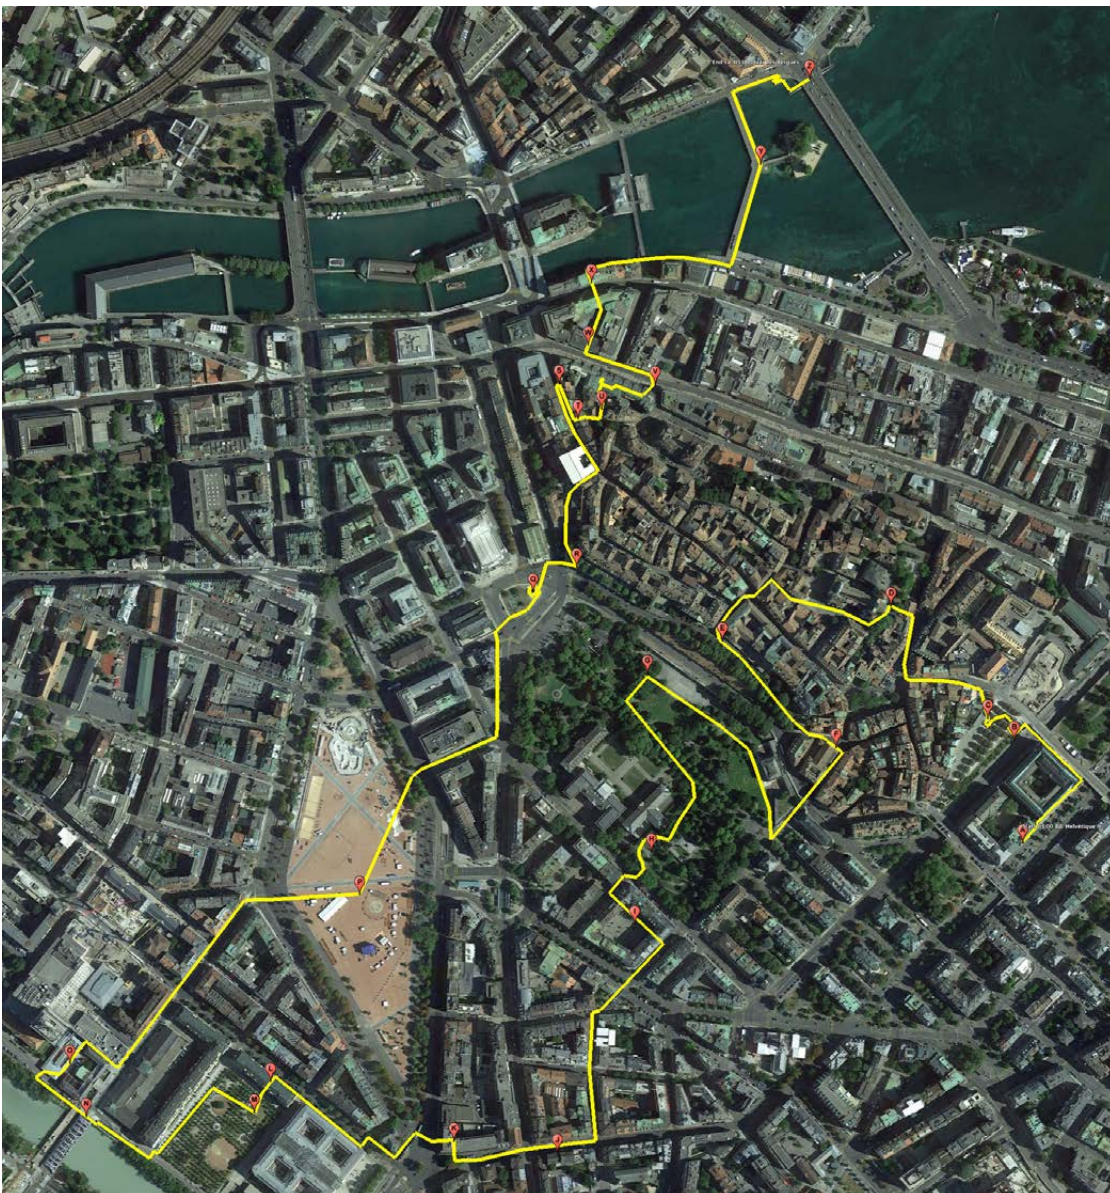

The project was selected by a jury to be part of the 24h non-stop conference **«Parenthesis – Unconference : a space to share processes in artistic research»** organized by the Swiss Artistic Research Network (SARN), May 6-7, 2014 in Geneva.

Concept, realisation, performance
